Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The number of transformed cells was determined by the number of colonies obtained on the selective medium. The results are the mean of three independent experiments. Error bars represent the standard deviation.

[illegible]

Figure 1 shows a series of nine line drawings of a person, arranged in a 3x3 grid. The drawings are labeled with numbers 3, 4, 5, 6, and 7 in the bottom right corner, indicating the age of the child who drew them. The drawings show a progression from a simple stick figure to a more detailed figure with a head, torso, and limbs. The figures are drawn in a simple, schematic style, with a head, torso, and limbs. The figures are drawn in a simple, schematic style, with a head, torso, and limbs. The figures are drawn in a simple, schematic style, with a head, torso, and limbs.

Docket No. 50-397

Director, Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Attention: Mr. B. J. Youngblood, Chief
Licensing Branch No. 1
Division of Licensing

Dear Mr. Youngblood:

Subject: WPPSS Nuclear Project No. 2
Engineering Evaluation of the
Sacrificial Shield Wall

- Reference: (1) WPPSS to NRC letter, "NRR Approval of WNP-2
Sacrificial Shield Wall Weld Preparation",
G02-80-95, April 25, 1980.
- (2) WPPSS to NRC letter, same subject as (1),
G02-80-131, June 20, 1980.
- (3) Memorandum from RH Engelken, Director, Region V,
to HD Thornburg, Director of Reactor Construction
Inspection, IE, "WNP-2 Sacrificial Shield Wall,
Pipe Whip Restraints, and Related Structures",
dated December 6, 1979.

The NRC's Office of Inspection and Enforcement has, based on our understanding, requested approval from NRR of the WPPSS corrective action plan for replacement of the slot welds on the Sacrificial Shield Wall (SSW) by a circumferential, partial penetration weld. References (1) and (2) provided information on the weld replacement to NRR. This letter transmits to you thirty (30) copies of the topical report, "Engineering Evaluation of the WNP-2 Sacrificial Shield Wall".

Mr. BJ Youngblood
Page 2

This report, References 1 and 2, and clarifications to be made at the forthcoming meeting, will provide sufficient information to NRR on the WNP-2 docket to accomplish the following:

- o Obtain NRR approval of the proposed replacement weld, and
- o Update previous licensing documents on the loads and design of the SSW to document the technical adequacy of the as-built condition of the SSW.

This report also provides WPPSS responses to the itemized concerns generated by I and E Region V (Reference 3) on the SSW. As such, this report is considered by WPPSS to be a comprehensive document, which in conjunction with identified actions in the report closes the technical aspects of the SSW issue on WNP-2 and will be referenced in the FSAR.

It is WPPSS intent to request, at the August 6, Bethesda meeting, technical release from NRR by August 15, 1980, for the limited scope of the slot weld substitution on the basis of past submittals, and clarifications in the presentation and attached report. The enclosed report with References 1 and 2 provides background information.

Very truly yours,

D. L. Renberger
