Docket No. 50-397

U. S. Nuclear Regulatory Commission
Office of Nuclear Reactor Regulation
Washington, D: C. 20555

Attention: Mr. Robert L. Tedesco
Assistant Director for Licensing

Gentlemen:

Subject: WPPSS Nuclear Project No. 2
WNP-2 PSAR/FSAR Design and Construction
QA Program Description Update

- Reference: 1) NRC letter dated November 20, 1980, R. L. Tedesco to RL Ferguson, "Staff Evaluation of Corrective Weld on the Sacrificial Shield Wall"
- 2) WPPSS letter QA-80-117, dated October 30, 1980, DL Renberger to WP Haas, "Supply System Organizational and Programmatic Changes"

We are initiating a revision to the WNP-2 Design and Construction QA Program description to be transmitted in response to your request included in Reference 1. This description, presently contained in the PSAR, will be updated and issued as an amendment to Section 17.1 of the FSAR for convenience purposes.

In a telephone conversation concerning Operational Quality Assurance, on November 26, 1980, Mr. D. L. Howard of the Supply System informed Mr. W. P. Haas, NRC-QAB, of our intentions with regard to Construction QA description and proposed a meeting to discuss the changes relative to it. A tentative date of February 25th was set for the meeting.

At the meeting, we will give you an approved-for-print draft of the updated QA Construction Program description and discuss in detail the changes from the program as described in the PSAR Appendix D. This will include:

- o The Project organization and the associated assignments of responsibility and authority. This will include Bechtel's intended duties and responsibilities in the Project organization, as appropriate.
- o The activities and actions implementing our response to the NRC letter of May 18, 1980 from the Office of Inspection and Enforcement seeking information pursuant to Section 50.54(f) of 10CFR Part 50.
- o All other changes required to provide a current and thorough description of our Design and Construction QA Program.

The Reference 2 letter provided notification of overall Supply System organizational changes. Notification will also be provided on any other changes significant to WNP-2 QA Program implementation.

Please inform our licensing engineer, Mr. O. K. Earle, if this date for a meeting is acceptable so that he can make appropriate arrangements.

Very truly yours,

A handwritten signature in dark ink, reading 'G. D. Bouchey', is written over a horizontal line.

G. D. Bouchey
Director, Nuclear Safety
