The image shows a document page that is severely degraded. It features a grid-like structure with multiple columns and rows, characteristic of a ledger or a form. The text within the grid is almost entirely illegible due to the high contrast and noise of the scan. There are prominent vertical streaks and horizontal bands across the page, which obscure the original content. The overall appearance is that of a low-quality, high-contrast scan of a printed document.

Attention: Mr. B. J. Youngblood, Chief
Licensing Branch No. 1
Division of Licensing

Gentlemen:

Subject: WPPSS Nuclear Project No. 2
Meeting Confirmation,
WNP-2 Sacrificial Shield Wall

Per a phone conversation with the NRC WNP-2 Licensing Project Manager, Mr. M. D. Lynch, the Supply System wishes to confirm a request for a meeting with appropriate members of the Materials Branch (MTEB) to discuss their review of the WNP-2 Sacrificial Shield Wall (SSW). Since we already have a meeting scheduled with the Containment Systems Branch (CSB) for the morning of January 21st, the afternoon of the same day would be convenient.

We plan to bring with us personnel fully cognizant in the nature and type of weld deficiencies in the SSW and will be glad to provide any explanations or clarifications to assist you in your review. We recommend that you also have in attendance Mr. George Georgiev of Inspection and Enforcement Headquarters Branch who has personally visited our site and inspected the Shield Wall.

Very truly yours,

G. D. BOUCHEY
Director, Nuclear Safety
