Mr. Jan A. Norris
U. S. Nuclear Regulatory Commission
Rm. 5215
4550 Montgomery Ave.
Bethesda, MD 20014

Dear Jan:

Enclosed please find the photo-ready mats for the WNP-2 DES-OL; also enclosed are two copies of the mats, two copies of the reduced WNP-2 FES-CP, and the diskettes for the mats. In addition, some extra blank mats are enclosed for any final processing necessary at NRC.

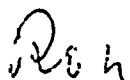

It is important that whoever at NRC is responsible for inserting the missing NRC sections be aware that all changes on the mats should first be incorporated on the diskettes: if insertions or changes are made on the mats, only, an inordinate amount of non-productive effort will be required at the FES stage to correct the problem, possibly impacting the FES publication date; furthermore, it should be noted that changes in page numbering will necessitate changes in numbering of the Table of Contents, List of Figures, and List of Tables - therefore, it would be worthwhile to make the NRC insertions within the context of the pages, as numbered. In no case will changes in page numbering affect cross-referencing, since cross-references are by section number. Finally, please note that in order to maintain consistency with other contemporary NRC statements, all pages should be reproduced without reduction (100%) except for Appendix J, the FES-CP, which is reproduced at 77%.

The missing NRC material is:

<u>NRC Material Needed</u>	<u>Section</u>	<u>Page</u>
Summation of Floodplain Impacts	Summary & Conclusions (item d)	ii
Table 4.1 (Recently Listed Archeological Resources)	4.3.5	4-13
Effects on Floodplain	5.3.2	5-2
Postulated Accidents	5.8.2	5-44
NRC Contributors	7	7-1

Please call me if you encounter any problems.

Sincerely yours,

R. A. Zussman
