Docket No. 50-397

Mr. A. Schwencer
Licensing Branch No. 2
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Schwencer:

Subject: SUPPLY SYSTEM ORGANIZATION AND STAFFING
QUALIFICATION FOR WNP-2

Enclosed for use in your review of WNP-2 are updated organization charts which reflect recent consolidations of business functions, safety-related functions and technical and analytical functions within the Supply System. These organizational changes do not affect the plant organizations and do not substantially affect the material presented during our meeting on September 24, 1981. These changes will be documented in our formal submittal of a revised Chapter 13 of the WNP-2 FSAR.

Additionally, the NRC staff reviewers requested additional information associated with several of the items in Appendix B of the FSAR, "WNP-2 Responses to Regulatory Issues Resulting from TMI-2." In response, we plan to provide this additional material prior to a site visit on this topic by the NRC staff which has tentatively been scheduled during December 1981.

Very truly yours,

G. D. Bouchey, Deputy Director
Safety and Security
