Docket No. 50-397

Mr. A. Schwencer, Chief
Licensing Branch No. 2
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Schwencer:

Subject: NUCLEAR PROJECT NO. 2
SER ISSUES

As requested during a phone conversation between Supply System representatives and Mr. R. Auluck and Mr. J. Ridgley of your staff on February 19, 1982, attachments providing additional information on WNP-2 Control Room Chillers and a drawing of the diesel generator exhaust line configuration showing tornado missile protection are submitted.

If you have any further questions, please contact Mr. P.L. Powell, (509) 377-2501 Extension 2909.

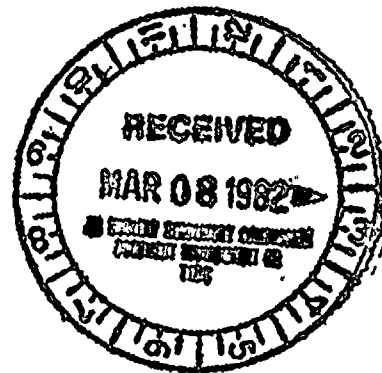

Very truly yours,

G.D. Bouchey

RECEIVED

ATTACHMENT I

The new control room chillers will be located in the enclosed HVAC rooms 1 and 2 in the Radwaste Building, elevation 525'.

There is no high energy piping located in these rooms. The chillers and their installation will conform to Seismic Category I Criteria and the associated documentation will be available for NRC review during the normal review period. The power supplies for these chillers will come from Class IE power supplies.

ATTACHMENT II

Dwg S856

The diesel generator exhaust runs vertically through the muffler and goes through a 90° elbow and then through a 45° elbow and terminates flush to the exterior of the penthouse. The 45° exhaust line constitutes missile protection for the diesel generator exhaust.
