Mr. B. H. Faulkenberry
U.S. Nuclear Regulatory Commission
Region V
1450 Maria Lane, Suite 210
Walnut Creek, California 94596

Subject: NUCLEAR PROJECT NO. 2
REPORT NO. 50-397/81-03

Reference: Letter No. G02-81-0270, R.G. Matlock to B.H. Faulkenberry,
dated September 4, 1981, NRC Inspection February 10 - March
13, 1981, Report No. 50-397/81-03

The reference letter provided a revised response to an NRC Notice of Violation, number 81-03/01. The response in Appendix A committed to incorporation of changes into the Specification Control List (SCL) by December 4, 1981 and the Drawing Control List (DCL) by April 30, 1982.

A number of specific items have been identified which present special problems and resulted in unanticipated delays in accomplishing full compliance. An example is the resolution of old Requests for Information (RFI's) which predated the Project Engineering Directive (PED) Program and for which documentation is not readily available. We anticipate that an extension of the commitment date to July 30, 1982 will provide the necessary time to achieve resolution of the problems related to both drawing control and specifications, and achieve full compliance with our program.
