Figure 6

Figure 7

[illegible]

Figure 1 displays four sets of line drawings, each representing a different group: Control (C), Low Back Pain (LBP), Low Back Pain with Cervical Pain (LBP+CP), and Low Back Pain with Cervical Pain and Headache (LBP+CP+H). Each set includes four drawings of the body from different perspectives: head, upper body, lower body, and feet. The drawings illustrate postural differences between the groups, with the LBP+CP+H group showing more pronounced postural deviations compared to the other groups.

1. *Phragmites australis* (Cav.) Trin. ex Steud.

[Faint handwritten notes at the bottom of the page]

1. The first group of people who are not in the majority are the people who are not in the majority.

[illegible]

1. *Chlorophyll a* and *Chlorophyll b* were determined by the method of Lichtenthaler and Whistler (1973). The total chlorophyll content was determined by the method of Arar and Cook (1980). The carotenoid content was determined by the method of Lichtenthaler and Whistler (1973). The total carotenoid content was determined by the method of Arar and Cook (1980). The total protein content was determined by the method of Lowry et al. (1951). The total lipid content was determined by the method of Bligh and Dyer (1959). The total carbohydrate content was determined by the method of Dubois and Gilles (1950). The total nucleic acid content was determined by the method of Burton (1956). The total ash content was determined by the method of AOAC (1984). The total moisture content was determined by the method of AOAC (1984). The total dry matter content was determined by the method of AOAC (1984). The total organic acid content was determined by the method of AOAC (1984). The total alkaloid content was determined by the method of AOAC (1984). The total saponin content was determined by the method of AOAC (1984). The total tannin content was determined by the method of AOAC (1984). The total flavonoid content was determined by the method of AOAC (1984). The total phenol content was determined by the method of AOAC (1984). The total terpenoid content was determined by the method of AOAC (1984). The total steroid content was determined by the method of AOAC (1984). The total glycoside content was determined by the method of AOAC (1984). The total alkaloid content was determined by the method of AOAC (1984). The total saponin content was determined by the method of AOAC (1984). The total tannin content was determined by the method of AOAC (1984). The total flavonoid content was determined by the method of AOAC (1984). The total phenol content was determined by the method of AOAC (1984). The total terpenoid content was determined by the method of AOAC (1984). The total steroid content was determined by the method of AOAC (1984). The total glycoside content was determined by the method of AOAC (1984).

1. *Chlorophyll a* and *Chlorophyll b* were determined by the method of Arar and Collins (1971) using a Shimadzu 1601 UV-Visible Spectrophotometer. The concentration of chlorophylls was expressed in mg/L.

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The number of transformed cells was determined by the number of colonies obtained after 2 weeks of growth on the selective medium. The results are the mean of three independent experiments. Error bars represent the standard deviation.

1. *Phragmites australis* (Cav.) Trin. ex Steud.

Figure 1 displays the four quadrants of the Rorschach inkblot test, labeled I through VIII. The quadrants are arranged in a 2x4 grid. The top row contains quadrants I, II, III, and IV. The bottom row contains quadrants V, VI, VII, and VIII. Each quadrant shows a different pattern of ink blots, which are used to assess personality and psychological state.

Docket No. 50-397

Mr. A. Schwencer, Chief
Licensing Branch No. 2
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Schwencer:

Subject: NUCLEAR PROJECT NO. 2
WNP-2 PUMP AND VALVE INSERVICE
TEST PROGRAM PLAN UPDATE

The Supply System is currently updating the WNP-2 Pump and Valve Inservice Test Program Plan. The update involves bringing the program into compliance with Section XI of the ASME Boiler and Pressure Vessel Code, 1980 Edition, with Addenda through Winter 1980, and reviewing current plant design and making appropriate changes to the program testing requirements. The Supply System anticipates that the currently approved Section XI will be the effective Section XI for WNP-2's first 120 months of operation.

The schedule for submission of the updated program to the NRC is September 1, 1982. Although the Supply System does not anticipate major changes in the program, it is requested that the NRC defer review of the WNP-2 program until submittal of the updated program.

Very truly yours,

G. D. Bouchey
Deputy Director, Safety and Security
