## Washington Public Power Supply System

3000 George Washington Way P.O. Box 968 Richland, Washington 99352-0968 (509)372-5000

July 19, 1983

G02-83-631

Docket No. 50-397

Director, Office of Nuclear Reactor Regulation  
Attention: Mr. A. Schwencer, Chief  
Licensing Branch No. 2, Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Schwencer:

Subject: WNP2  
ER-OL Table 12.1-1

Pursuant to a recent telephone inquiry from Ms. Elaine Chan, we have reviewed the status of the various permits and licenses noted in Table 12.1-1. As of this date, all of the licenses and permits listed have been procured, with the understandings and limitations set forth below.

- o U.S. Nuclear Regulatory Commission - Plant Operating License. The Supply System is currently in the final approval stages for this license, and we expect to be awarded same in the near future.
- o U.S. Nuclear Regulatory Commission - Nuclear Instrumentation License. Items which used to be authorized by this permit have been included in turn in our By-Product Materials License (Materials License 46-17964-01) and our Special Nuclear Materials License (Materials License SNM-1890), and will soon be included in our Operating License.
- o Division of Highways and Transportation. In almost all cases, permits for oversize or overweight loads have been secured by the vendor. In rare instances, we have secured them.

Dates for issuance and expiration of permits, and permit numbers, are set forth in the accompanying table.

If we can be of further assistance, please do not hesitate to call me at (509) 372-5238.

Sincerely,

G. C. Sorensen, Manager (Acting)  
Nuclear Regulatory and Safety Programs
