Docket No. 50-397

Director of Nuclear Reactor Regulation
Attention: Mr. A. Schwencer, Chief
Licensing Branch No. 2
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Schwencer:

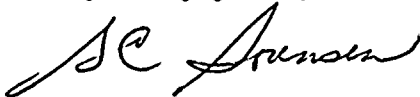

Subject: NUCLEAR PROJECT NO. 2
FIRE PROTECTION - RICHLITE PGCC FLOOR PLATES

Reference: Letter, G02-83-981, G. C. Sorensen (SS) to A.
Schwencer (NRC), "Response to Fire Protection
Site Audit Concerns", dated October 28, 1983

An approximately 18 square foot area around a column in the PGCC has been replaced with Richlite floor plates to eliminate a personnel safety hazard. This area is shown in the attached revised figure, which was part of the reference letter that included the GE report on the PGCC. The additional Richlite material does not compromise the GE report which states that only approximately 4% of the PGCC contains Richlite floor plates.

Should you have further questions, please contact Mr. P. L. Powell, Manager, WNP-2 Licensing.

Very truly yours,

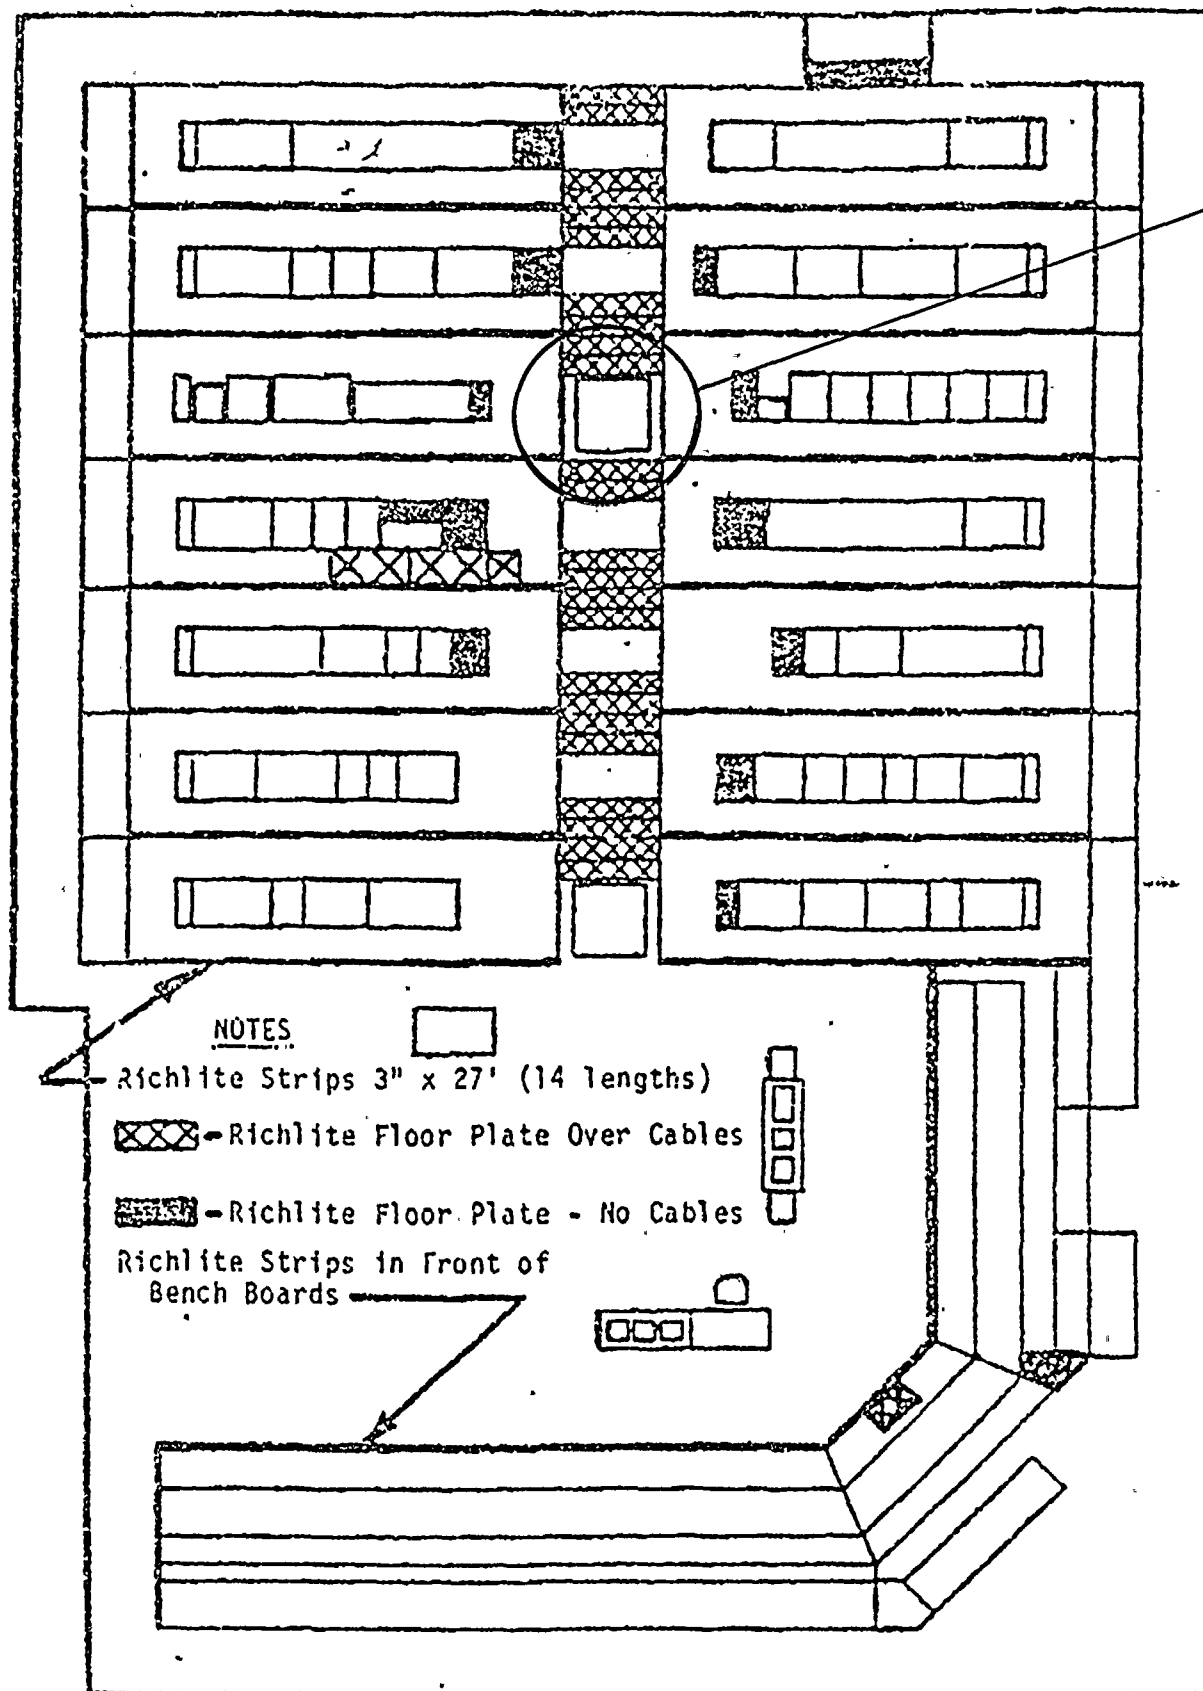

G. C. Sorensen, Manager
