Docket No. 50-397

Director of Nuclear Reactor Regulation
Attention: Mr. A. Schwencer, Chief
Licensing Branch No. 2
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Schwencer:

Subject: NUCLEAR PLANT NO. 2
OPERATING LICENSE NPF-21,
REQUEST FOR LICENSE AMENDMENT, CLARIFICATION

References: 1) Letter, G02-84-032, G. C. Sorensen (SS) to
A. Schwencer (NRC), "Operating License NPF-21,
Request for License Amendment", dated January 20, 1984
2) Letter, G02-84-65, G. C. Sorensen (SS) to A.
Schwencer (NRC), "License Amendment 10 CFR 50.92,
Significant Hazards Analysis", dated February 8, 1984

Reference 1 requested a change to technical specification LCO 3/4.8.1 to allow the flexibility to perform more than one cold start test of the diesel generators per 184 days as currently prescribed by paragraph 4.8.1.1.2.a.4 (attached). As discussed in a phone conversation February 7, 1984, between P. Powell (SS) and Messrs. R. Auluck and D. Hoffman (NRC), the staff determined to modify the technical specification generically to allow the requested flexibility (see attached). Accordingly, the change requested in the reference letter is hereby modified to be the same as the staff's generic resolution.

REQUEST FOR LICENSE AMENDMENT, CLARIFICATION

The significant hazards analysis provided in Reference 2 remains applicable. This change reduces a possible compromise to plant safety and therefore represents no significant hazard.

The fee for consideration of this license amendment was provided by Reference 1, and since the intent of the original request has not changed, no additional fee is appropriate.

In accordance with 10 CFR 50.91, the State of Washington has been provided a copy of Reference 1 and this clarification. Should you have any questions, please contact Mr. P. L. Powell, Manager, WNP-2 Licensing.

Very truly yours,

G. C. Sorensen, Manager
Regulatory Programs
