Docket No. 50-397

Director of Nuclear Reactor Regulation
Attention: Mr. A. Schwencer, Chief
Licensing Branch No. 2
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Schwencer:

Subject: NUCLEAR PLANT NO. 2
USE OF ASME CODE CASE N-362, PRESSURE TESTING
OF CONTAINMENT ITEMS, SECTION III, DIVISION 1

This letter requests authorization to use the subject code case. As related in a phone conversation between Mr. R. Kirkwood (NRC) and Messrs. T. A. Stanley and P. L. Powell (SS) on February 10, 1984, the subject code case will be listed as acceptable in Revision 22 to Regulatory Guide 1.84. As related, Revision 22 to R.G. 1.84 is currently being approved for issuance by the NRC, and when issued will include Code Case N-362 as written with no additional requirements other than those shown on the attached case report. Code Case N-362 is not listed in Revision 21 to R.G. 1.84.

In the interim, the Supply System desires to use the subject code. Your written authorization to implement Code Case N-362 is requested.

Very truly yours,

G. C. Sorensen
G. C. Sorensen, Manager
Regulatory Programs

**CASE
N-362**

CASES OF ASME BOILER AND PRESSURE VESSEL CODE

*Meeting of November 12, 1982
Approved by Council, February 14, 1983*

*This Case shall expire on February 14, 1986
unless previously annulled or reaffirmed.*

**E Case N-362
Pressure Testing of Containment Items
Section III, Division 1**

Inquiry: What alternative rules may be used for Section III, Division 1, Class 1, 2, and MC construction, in lieu of the system test pressure specified in NB-6221 and NC-6221 for Class 1 and 2 items, such as flued heads and expansion bellows, that become part of the containment system?

Reply: It is the opinion of the Committee that, for Section III, Division 1, Class 1, 2 and MC construction, the following rules may be used as an alternative to the system test pressure specified in NB-6221 and NC-6221 for Class 1 and 2 items, such as flued heads and expansion bellows, that become part of the containment system:

- (1) The items and connecting welds shall be pressure tested at the containment Design Pressure.
- (2) All other requirements of Section III, Division 1, for the applicable class of construction shall be met.
- (3) This Case is applicable only to that portion of an item that performs a containment system function.
- (4) The Case number shall be identified in the Data Report.
