Docket No. 50-397

Director of Nuclear Reactor Regulation
Attention: Mr. A. Schwencer, Chief
Licensing Branch No. 2
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Schwencer:

Subject: NUCLEAR PLANT NO. 2
OPERATING LICENSE NPF-21, REQUEST FOR
AMENDMENT, RETRACTION OF

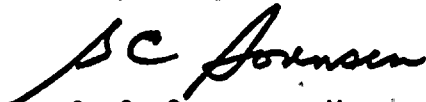

Reference: Letter, G02-84-106, G. C. Sorensen (SS) to A.
Schwencer (NRC), "Operating License NPF-21,
Request for Amendment", dated March 1, 1984

The referenced letter requested a change in Licensing Condition (13) to defer the demonstration of a dissolved gas analysis capability for the Post Accident Sample System (PASS). This request was made because installation of a hardware modification on the PASS due to be shipped on March 9, 1984 could affect the availability of the PASS and possibly impact the WNP-2 power ascension program.

The Supply System has reviewed the installation, training, and procedure modifications required by this hardware change and determined that the modification can be completed without impact on the power ascension program. An intensive effort is being directed toward this goal. Accordingly, the request for amendment forwarded by the reference letter is hereby retracted.

The reference letter also provided the Supply System position with respect to PASS capability on shift, the required preparation time to support obtaining a PASS sample, and the present status of system trace heating. These positions remain applicable. Should you have any questions, please contact Mr. P. L. Powell, Manager, WNP-2 Licensing.

Very truly yours,

G. C. Sorensen, Manager
