Mr. Darrell G. Eisenhut, Director  
Division of Licensing  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Eisenhut:

Subject: SUPPLY SYSTEM NUCLEAR PROJECT NO. 2  
INSPECTIONS OF BWR STAINLESS STEEL PIPING  
(GENERIC LETTER 84-11)

Reference: Generic Letter 84-11, dated April 19, 1984

The reference letter requires a response, pursuant to 10CFR50.54(f), from all BWR Licensees no later than 45 days from the date of the letter. A request for an extension of time for submittal of the required information must be submitted no later than 15 days from the date of the letter (i.e., by May 4, 1984).

For reasons unknown to us, your letter of April 19 was not received by the Supply System until May 2, 1984. At this point, we have not had sufficient time to review the requirements of Generic Letter 84-11 to determine if an extension will be required or not. Therefore, we are requesting an extension of the 15 day deadline to May 15, 1984.

As you are aware, our BWR (WNP-2) is still undergoing startup testing. In addition, we have performed induction heat stress improvement on a large number of the welds which are susceptible to intergranular stress corrosion cracking.

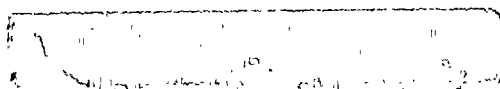

For the above reasons, we feel that the requested extension is reasonable. Note that this is only a request for an extension of the 15 day deadline. Upon evaluation of the requested information, we may or may not request an extension of the required (45 day) response to Generic Letter 84-11.

Very truly yours,

G. C. Sorensen, Manager  
Regulatory Programs

GCS/kd
