## Washington Public Power Supply System

P.O. Box 968 3000 George Washington Way Richland, Washington 99352 (509) 372-5000

May 30, 1984  
G02-84-363

Docket No. 50-397

Director of Nuclear Reactor Regulation  
Attention: Mr. A. Schwencer, Chief  
Licensing Branch No. 2  
Division of Licensing  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Schwencer:

Subject: NUCLEAR PLANT NO. 2  
OPERATING LICENSE NPF-21, REQUEST FOR  
AMENDMENT TO TECHNICAL SPECIFICATION  
SURVEILLANCE 4.3.7.11, RETRACTION OF

Reference: Letter, G02-84-126, G. C. Sorensen (SS) to A.  
Schwencer (NRC), "Operating License NPF-21,  
Request for Amendment", dated March 9, 1984

The referenced letter requested a change to technical specification Table 4.3.7.11-1 to delete the requirement to verify isolation and annunciation on "high voltage abnormally low" during the quarterly channel functional surveillance test of the liquid radwaste effluent line monitor (pg. 3/4 3-88, WNP-2 technical specifications). This request was made to avoid an electrical hazard and potentially shocking the detector into failure.

As discussed in a phone conversation between Messrs. R. Auluck and R. Kendall of your staff and Mr. P. L. Powell (SS) on May 23, 1984, the Supply System has determined that compliance to the technical specification as presently in effect can be met without posing an electrical hazard or failing the detector. Accordingly, the Supply System hereby retracts the requested change.

Should you have any further questions, please contact Mr. P. L. Powell, Manager, WNP-2 Licensing.

Very truly yours,

  
G. C. Sorensen, Manager  
Regulatory Programs
