TOTAL NUMBER OF COPIES REQUIRED: LTTR 64 ENCL 10

Figure 1. The effect of the number of trials on the number of correct responses. The number of correct responses was significantly higher than the number of incorrect responses in all conditions. The number of correct responses was significantly higher than the number of incorrect responses in all conditions. The number of correct responses was significantly higher than the number of incorrect responses in all conditions.

[illegible]

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

The image shows a document page with a grid-like structure, likely a ledger or form. The page is heavily degraded with noise and artifacts, making the content largely illegible. The layout appears to have multiple columns and rows, with some text visible in the left margin and across the main body. The text is mostly black on a white background, but the noise makes it difficult to read. There are some faint, illegible markings that might be names or dates, but they cannot be transcribed accurately.

Mr. Harold Denton, Director  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Denton:

Subject: WITHDRAWAL OF THREE PUBLIC UTILITY DISTRICTS FROM  
WASHINGTON PUBLIC POWER SUPPLY SYSTEM

Recently, three (3) Public Utility Districts have decided to withdraw from the Supply System.

The three PUD's, representing Cowlitz, Clallum and Mason counties cited "... concerns over renewing or obtaining liability insurance for their officers and directors in Supply System-related lawsuits" as a reason for withdrawing from the Supply System.

Withdrawing from the Supply System does not release these Public Utility Districts from their financial and contractual obligation to the Supply System. It does, however, eliminate their ability to sit as members of the Supply System's Board of Directors and to vote on Supply System business matters.

As you are aware, the Supply System is a joint operating agency of the state of Washington. Prior to the withdrawal of these three Public Utility Districts, the Supply System was composed of nineteen (19) Public Utility Districts and four (4) municipal utilities. Membership now is sixteen (16) Public Utility Districts and four (4) municipalities. Each of these twenty agencies has a representative on the Supply System Board of Directors.

The withdrawal of these three PUD's from the Supply System will not impact the Supply System's activities or ability to function in the operation of WNP-2 or at the shutdown WNP-1 and WNP-3 projects. The purpose of this letter is simply to advise you of this change that has occurred in the Supply System organization.

Very truly yours,

G. C. Sorensen, Manager  
Regulatory Programs

GCS/kd
