Docket No. 50-397

Director of Nuclear Reactor Regulation
Attention: Mr. A. Schwencer, Chief
Licensing Branch No. 2
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Schwencer:

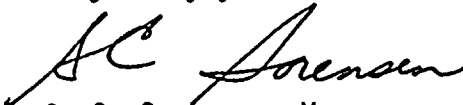

Subject: NUCLEAR PLANT NO. 2, OPERATING LICENSE NPF-21,
REQUEST FOR AMENDMENT TO TECHNICAL SPECIFICATIONS
FOR HPCS PUMP DISCHARGE PRESSURE - HIGH SIGNAL
(TABLES 3.3.3-1, 3.3.3-2, AND 4.3.3.1-1),
CHANGE IN DATE REQUIRED

Reference: Letter, G02-85-098, G. C. Sorensen (SS) to A.
Schwencer (NRC), Same Subject, dated February 27, 1985

At the direction of the Bonneville Power Administration (BPA), the beginning date for the next scheduled maintenance outage (M-3) has been moved to approximately May 1, 1985. The duration remains the same, still projected to be 60 days. For this reason, the amendment requested in the reference letter does not have to be effective until July 1, 1985. However, the Supply System would like to have at least 30 days in which to either implement this change or to make alternative arrangements. Therefore, we request that a target date of June 1, 1985, be established for final NRC disposition of this request for amendment.

Should you have any questions on this matter, please contact Mr. P. L. Powell, Manager, WNP-2 Licensing.

Very truly yours,

G. C. Sorensen, Manager
