REGION V

March 29, 1985  
G02-85-180

Docket No. 50-397

Mr. J. B. Martin  
Regional Administrator  
Region V  
U.S. Nuclear Regulatory Commission  
1450 Maria Lane, Suite 210  
Walnut Creek, CA 94596

Dear Mr. Martin:

Subject: NUCLEAR PLANT NO. 2  
SAFETY EVALUATION REPORT SUMMARY  
(10 CFR 50.59), SUPPLEMENTAL INFORMATION

References: 1) Letter, G02-84-654, G. C. Sorensen (SS) to J. B. Martin (NRC), "Safety Evaluation Report Summary (10 CFR 50.59)", dated December 20, 1984  
2) Letter, J. D. Martin (SS) to J. B. Martin (NRC) "1984 Annual Report", dated February 28, 1985

The references provided summaries of safety evaluations completed per 10 CFR 50.59 based on a criteria that those significant safety evaluations requiring additional analysis and evaluation beyond a routine evaluation would be reported. Subsequent conversations between Messrs. P. L. Powell (SS) and P. Johnson of your staff have indicated that the criteria should be revised to include all evaluations of changes or special tests or experiments that impact the Final Safety Analysis Report (FSAR), or in the case of special tests or experiments, are not described in the FSAR.

SAFETY EVALUATION REPORT SUMMARY (10 CFR 50.59), SUPPLEMENTAL INFORMATION

Accordingly, the Supply System has reviewed the changes and tests or experiments completed during the reporting intervals of the references and concluded that no other unreported changes meet this criteria and the reports, as submitted, do reflect those design changes meeting the revised criteria.

Should you have any questions, please contact Mr. P. L. Powell, Manager, WNP-2 Licensing.

Very truly yours,

G. C. Sorensen, Manager  
Regulatory Programs
