Docket No. 50-397

G02-85-552

September 11, 1985

Director of Nuclear Reactor Regulation
Attention: Mr. W. R. Butler, Chief
Licensing Branch No. 2
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Butler:

Subject: NUCLEAR PLANT NO. 2
OPERATING LICENSE NPF-21, REQUEST FOR AMENDMENT TO
ADMINISTRATIVE CONTROLS FOR CORPORATE NUCLEAR SAFETY
REVIEW BOARD (CNSRB) 6.5.2.2

In accordance with the Code of Federal Regulations, Title 10, Parts 50.90 and 2.101, the Supply System hereby requests an amendment to the "Administrative Controls" section of the subject Technical Specifications. The proposed amendment involves the Corporate Nuclear Safety Review Board (CNSRB 6.5.2.2).

Technical Specification (TS) 6.5.2.2, as presently written (see attached), states in part, that "The plant organization and the Directorates of Engineering, Support Services, and Licensing and Assurance shall be represented..." on the CNSRB. The Supply System proposes this sentence be deleted from the subject specification to provide increased flexibility in choosing the best technical representative, independent of organizational constraints. Thus, the highest level of technical expertise can be insured as required in Section 4.7 of ANSI/ANS 3.1-1981 and Specification 6.5.2.1. In addition, this change is consistent with current industry practice, as indicated in the same technical specification sections for Limerick No. 1, Shoreham No. 1, Susquehanna No. 1, Fermi No. 2 and the General Electric Standard.

The Supply System has reviewed this change per 10 CFR 50.59 and determined that no unreviewed safety questions will result from this amendment. This TS change has been reviewed and approved by the WNP-2 Plant Operations Committee and the Supply System Corporate Nuclear Safety Review Board.

On April 6, 1983, the NRC published guidance in the Federal Register (48 FR 14870) concerning examples of amendments that are not likely to involve significant hazards consideration. One such example, (i) involves a "... purely administrative change to technical specifications: for example, a change to achieve consistency throughout the technical specifications, correction of an error, or a change in nomenclature." Accordingly, this proposed change to the technical specifications involves no significant hazards consideration.

The Supply System has evaluated this request in accordance with 10 CFR 170.21 and has included a warrant for One hundred fifty dollars (\$150.00) as initial payment for this application for amendment under Facility Category A (Power Reactors).

In accordance with 10 CFR 50.91, the State of Washington has been provided a copy of this letter. Should you have any questions, please contact Mr. P. L. Powell, Manager, WNP-2 Licensing.

Very truly yours,

G. C. Sorensen, Manager
Regulatory Programs
