Docket No. 50-397

Director of Nuclear Reactor Regulation
Attention: Ms. E. G. Adensam, Project Director
BWR Project Directorate No. 3
Division of BWR Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Ms. Adensam:

Subject: NUCLEAR PLANT NO. 2
AMENDMENT NO. 36 TO THE WNP-2 FINAL
SAFETY ANALYSIS REPORT (FSAR)

In accordance with 10 CFR 50.71, Section (e)(3)(i), the Supply System hereby submits thirteen (13) copies of Amendment No. 36 to the WNP-2 (license basis) FSAR. This revision reflects changes made since the last submittal of the FSAR (November 1984) and is current as of June 20, 1985. No significant plant system changes were made over this period so the bulk of the amendment changes are administrative in nature; to make system descriptions consistent with current plant design, tense changes, editorial corrections, typographical errors and clarification of ambiguities and inconsistencies in the text. A significant effort was expended to incorporate the responses to previously answered NRC questions into the text and improve the conciseness and accuracy of the text.

Minor technical changes were made as a result of system upgrading, component modifications, or improvements in procedural processes.

All changes have been subject to an intense review effort by Supply System personnel; no consultant or external organizations have been utilized in this effort.

AMENDMENT NO. 36 TO THE WNP-2 FINAL SAFETY ANALYSIS REPORT (FSAR)

This amendment does not introduce new systems previously unmentioned nor does it make safety significant changes, but rather attempts to reflect plant progress and responses to NRC staff requests in the historical (license issue) FSAR and improve conciseness and accuracy. Each change has been assessed per 10 CFR 50.59 and deemed not to include any unresolved safety questions.

Should you have any questions, please contact Mr. P. L. Powell, Manager, WNP-2 Licensing.

Very truly yours,

G. C. Sorensen, Manager
Regulatory Programs
