Docket No. 50-397

Director of Nuclear Reactor Regulation  
Attn: E. G. Adensam, Project Director  
BWR Project Directorate No. 3  
Division of BWR Licensing  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Ms. Adensam:

Subject: NUCLEAR PLANT NO. 2  
OPERATING LICENSE NPF-21, WITHDRAWAL OF REQUEST  
FOR TECHNICAL SPECIFICATION AMENDMENT, DRYWELL  
AND SUPPRESSION CHAMBER PURGE SYSTEM (SECTION 3.6.1.8)

- References: 1) Letter, G02-85-858, G. C. Sorensen (SS) to E. G.  
Adensam (NRC), Same Subject, dated December 20, 1985
- 2) Letter, G02-85-895, G. C. Sorensen (SS) to E. G.  
Adensam (NRC), Same Subject, dated December 31, 1985

The reference letters resulted in a one time only request to amend the WNP-2 Technical Specifications to change the Standby Gas System purge limit from 90 to 150 hours. Given that our current refueling outage began earlier than scheduled, as well as our being able to avoid having to purge for unexpected occurrences, this Technical Specification amendment is no longer required. Please withdraw it from any further consideration.

Should you have any questions regarding this matter, please contact Mr. P. L. Powell, Manager, WNP-2 Licensing.

Very truly yours,

*for G. C. Sorensen*  
G. C. Sorensen, Manager
