Docket No. 50-397

Director of Nuclear Reactor Regulation
Attn: Ms. E. G. Adensam, Project Director
BWR Project Directorate No. 3
Division of BWR Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Ms. Adensam:

Subject: NUCLEAR PLANT NO. 2
ANTICIPATED TRANSIENT WITHOUT SCRAM
IMPLEMENTATION SCHEDULE

Reference: Letter, G02-85-718, G.C. Sorensen (SS) to W.R. Butler
(NRC), same subject, dated October 14, 1985

The reference was submitted in compliance with 10CFR50.62(d) providing a schedule for completion of the required Anticipated Transients Without Scram (ATWS) modifications. As discussed, the Supply System intends to complete the modifications by the end of the planned Spring 1988 re-fueling/maintenance outage. Additionally, as specified in 10CFR50.62(d) NRC agreement with the ATWS implementation schedule was requested. To date no confirmation of the proposed schedule has been received and the Supply System is proceeding with procurement and outage planning schedules to support the proposed schedule. If negotiation of the schedule is required at this time, design and procurement lead times are such that acceleration of the proposed schedule would be difficult.

Should you have any questions, please contact Mr. P. L. Powell, Manager, WNP-2 Licensing,

Very truly yours,

G. C. Sorensen, Manager
