SECRET

1. The first part of the document discusses the importance of maintaining accurate records of all activities. It emphasizes that this is essential for ensuring the integrity and reliability of the information collected. The document also notes that this process is a continuous one, requiring regular updates and reviews.

2. The second part of the document outlines the specific procedures for collecting and analyzing data. It describes the various methods used to gather information, including interviews, surveys, and observations. It also details the steps involved in processing and interpreting the data, ensuring that it is presented in a clear and concise manner.

3. The third part of the document discusses the importance of maintaining the confidentiality of the information collected. It stresses that this is a critical requirement for all activities, and that strict measures must be taken to protect the data from unauthorized access or disclosure. The document also outlines the procedures for handling and disposing of sensitive information.

4. The fourth part of the document discusses the importance of maintaining the accuracy of the information collected. It stresses that this is a critical requirement for all activities, and that strict measures must be taken to ensure that the data is reliable and valid. The document also outlines the procedures for verifying and validating the information, ensuring that it is presented in a clear and concise manner.

5. The fifth part of the document discusses the importance of maintaining the integrity of the information collected. It stresses that this is a critical requirement for all activities, and that strict measures must be taken to ensure that the data is not tampered with or altered. The document also outlines the procedures for monitoring and controlling the information, ensuring that it is presented in a clear and concise manner.

Docket No. 50-397

Document Control Desk  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Attention: Mr. Harrold R. Denton, Director  
Office of Nuclear Reactor Regulation

Subject: RESPONSE TO GENERIC LETTER 87-06

NRC Generic Letter 87-06 "Periodic Verification of Leak Tight Integrity of Pressure Isolation Valves", was issued by the Commission on March 13, 1987, and requested a response pursuant to 10CFR 50.54(f) by licensees within 90 days.

The WNP-2 Technical Specifications contain leak rate testing requirements for all primary isolation valves required by NUREG-0123.

Should you have any questions regarding our response, please contact me.

Very truly yours,

*G. C. Sorensen*
