Docket No. 50-397

U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, D.C. 20555

Gentlemen:

SUBJECT: NUCLEAR PLANT NO. 2
OPERATING LICENSE NPF-21
LETTER OF APPRECIATION, J. O. BRADFUTE

The present state of licensing activities supporting the current WNP-2 outage and the recent NRR reorganization mark an appropriate moment in which to extend appreciation to Mr. J. O. Bradfute for his personal efforts in assisting the Supply System in his role as the Nuclear Regulatory Commission's Project Manager for WNP-2.

Despite an inordinate amount of activity on other issues related to WNP-2 which consumed a great deal of his time, Mr. Bradfute has been able to obtain review and approval of several needed technical specification changes crucial to successfully maintaining the planned outage schedule. Obviously, his position as WNP-2 Project Manager required the resolution of these activities, but it is felt that without exceptional perseverance, his willingness to spend whatever time was needed even at his own personal expense, and attention to detail on his part the impact to the present outage could have been significant and telling in allocation of resources and potential delay.

LETTER OF APPRECIATION, JO BRADFUTE

Although Mr. Bradfute is no longer serving as Project Manager for WNP-2, the Supply System has appreciated his efforts since he assumed that position in the Spring 1985. We feel that he has represented the NRC in a truly professional manner, and look forward, should the opportunity arise, to working with him again in the future.

Very truly yours,

G. C. Sorensen
