Docket No. 50-397

U.S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Washington, D.C. 20555

Gentlemen:

Subject: NUCLEAR PLANT NO. 2  
REQUEST FOR INTERIM APPROVAL OF REVISION 3B TO THE  
WNP-2 PUMP AND VALVE INSERVICE TEST PROGRAM PLAN

The Supply System has updated the WNP-2 Pump and Valve Inservice Test Program Plan (Revision 3b). The primary purpose of this revision was to incorporate changes to the Program Plan due to recent design changes to the plant. Additional changes associated with technical evaluation activities as well as numerous editorial, clerical, and administrative changes are also included. This revision of the Plan incorporates the latest information available as of September 30, 1987 and provides added assurance of public safety and material quality. This revision of the Plan is submitted as the controlling document governing the inservice testing of certain safety related pumps and valves at WNP-2. The current revisions of the implementing surveillance test procedures are based on the test requirements specified in this revision of the Plan.

Revision 2 of the Plan received interim approval from the Commission in the WNP-2 Safety Evaluation Report, Supplement 4, NUREG-0892 dated December, 1983 pending completion of a comprehensive review of the Plan. Since a comprehensive review of the Plan is still incomplete, the Supply System requests the Commission to grant interim approval of Revision 3b of the Plan such that WNP-2 will continue to have a legitimate basis for its implementing procedures.

REQUEST FOR INTERIM APPROVAL OF REVISION 3B TO THE WNP-2  
PUMP & VALVE INSERVICE TEST PROGRAM PLAN

Enclosed for NRC review are five (5) copies of Revision 3b of the Plan. Additional copies and drawings will be furnished upon request. Also, enclosed is an application fee of One hundred fifty dollars (\$150.00) in accordance with 10 CFR 170.12(f). Should you have any questions, please contact Mr. P. L. Powell, Manager, WNP-2 Licensing.

Very truly yours,

G. C. Sorensen, Manager  
Regulatory Programs
