Docket No. 50-397

U. S. Nuclear Regulatory Commission

Attn: Document Control Desk

Washington, D.C. 20555

Gentlemen:

Subject: NUCLEAR PLANT NO. 2
LICENSE NO. NPF-21
NRC INSPECTION REPORT 86-25

Reference: NOV Response Letter, GC Sorensen (SS) to
JB Martin (NRC-RV), same subject, dated
January 28, 1987

In the referenced letter the Supply System committed to replace the Shift Manager's office window with a special fire-rated window by January 1, 1988. The commitment was made as a result of NRC Inspection Report Notice of Violation 86-25-15 which identified the failure to follow procedures that implemented the fire protection program. Specifically, the fire protection staff did not review a Plant Design Change Package associated with modifications to the Shift Manager's office in the Control Room.

Although it was recognized that a long lead time was required to obtain the special fire-rated window, the window has been procured and is currently on site. However, other material procurement and design problems have occurred during the modification process such that we will not be able to meet the January 1, 1988 commitment date.

As a result, it is now anticipated that the window in the Shift Manager's office will be replaced with the special fire-rated window by April 30, 1988.

Should you have any questions regarding this letter, please contact Mr. P. L. Powell, Manager, WNP-2 Licensing.

Very truly yours,

G. C. Sorensen, Manager
