Docket No. 50-397

U. S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, D. C. 20555

Gentlemen:

Subject: NUCLEAR PLANT NO. 2
RESPONSE TO IE BULLETIN 85-03
SUPPLEMENT 1

The subject IE Bulletin supplement requested partial response within 30 days of receipt (received by the Supply System May 4, 1988). The BWR Owner's Group formed a committee to respond to the initial IEB 85-03 concerns and is presently preparing a generic response to the supplement. The Supply System is a participant in the BWR Owner's Group IEB 85-03 activities and as such is committed to addressing the concerns of the supplement, inadvertent valve mispositioning, as evaluated by the BWROG program. However, the timeliness of the Supply System response to the supplement is directly linked to the BWROG completion of the generic program. It is anticipated that the BWROG generic response will exceed the requested 30 day response period. Accordingly, the Supply System response to the 30 day requirement will be submitted within a reasonable interval following the generic BWROG submittal.

Page Two
NUCLEAR PLANT NO. 2
RESPONSE TO IE BULLETIN 85-03
SUPPLEMENT 1

Additionally, the supplement directed that all activities as a result of the supplement were to be completed by the next refueling outage following the date of the supplement: April 27, 1988. The Supply System is presently in a refueling outage which started May 2, 1988 and is scheduled for completion in early June, 1988. Obviously the completion of a program and response within these time frames was not the intent of the supplement and a more reasonable time frame was contemplated. In keeping with this intent, the Supply System will complete any additional activities as a result of the supplement by the end of the spring 1989 refueling outage.

Should you have any questions, please contact Mr. P. L. Powell, Manager, WNP-2 Licensing.

Very truly yours,

G. C. Sorensen, Manager
Regulatory Programs
