Docket No. 50-397

U. S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, D. C. 20555

Gentlemen:

Subject: NUCLEAR PLANT NO. 2
OPERATING LICENSE NPF-21
DEFERRAL OF RESPONSE TO REQUEST FOR INFORMATION -
NRC ATWS RULE 10 CFR 50.62

Reference: 1. Letter GC Sorensen (SS) to NRC, "Response to Request
for Information - NRC ATWS Rule, 10 CFR 50.62," dated
April 13, 1987
2. Letter RB Samworth (NRC) to GC Sorensen (SS),
"10 CFR 50.62 ATWS Rule," dated April 18, 1988

Reference 1 provided the Supply System response to a request for information with regard to ATWS modifications at WNP-2. Reference 2 provided questions to the Supply System as a result of the staff's review of reference 1 and requested response within 30 days of receipt (May 25, 1988). The Supply System is presently in the process of installing the ATWS ARI modification. However, recent design reviews have caused some changes in the design and supporting documents. As a result of this impact, meeting the May 25, 1988 schedule with an adequate, finished response is not possible.

Accordingly, in a phone conversation on May 17, 1988 between Mr. R. B. Samworth (NRC) and P. L. Powell (SS) this situation was reviewed and a conclusion reached that submittal by June 24, 1988 would be satisfactory.

Should you have any questions, please contact Mr. P. L. Powell, Manager, WNP-2 Licensing.

Very truly yours,

G. C. Sorensen, Manager
