

**MICHIGAN STATE  
UNIVERSITY**

**MEMORANDUM**

Date: 11 October 2017

To: Bryan Parker, USNRC

From: Peter Grivins, MSU FRIB-NSCL RSO

Copies: Dr. David Morrissey, Radiation Safety Committee Chair

Subject: Request for Amendment to 21-00021-31

I am writing to request to amend the Michigan State University license number 21-00021-31. We wish to add a line to the list of possession limits, to read as follows:

*Any byproduct material with Atomic Nos. 1 through 83, Activation products, 1 millicurie per source and 100 millicuries total, For research and development as defined in 10 CFR 30.4.*

**FRIB**

The proposed amendment will provide flexibility in the FRIB-NSCL research program to work with a wider range of isotopes that are routinely produced by nuclear fragmentation reactions.

Thank you for your consideration.

Environmental Safety, Health  
and Quality Manager
