Docket 50-397

U. S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Mail Station P1-137  
Washington, D. C. 20555

Subject: NUCLEAR PLANT NO. 2  
RESPONSE TO GENERIC LETTER 88-11, RADIATION  
EMBRITTELEMENT OF REACTOR VESSEL MATERIALS,  
REGULATORY GUIDE 1.99, REVISION 2

As directed by the subject generic letter, the Supply System is in the process of evaluating the WNP-2 reactor vessel materials per Regulatory Guide 1.99, Rev. 2 and will be revising the WNP-2 pressure/temperature curves. When completed this evaluation will be used to support a technical specification change scheduled for submittal October 1989. With WNP-2 being relatively "young" the impact of radiation embrittlement is minimal and a submittal on the above schedule remains conservative. This response satisfies the 180 day submittal requested by the generic letter.

Very truly yours,

G. C. Sorensen, Manager  
Regulatory Programs
