Docket No. 50-397

June 26, 1989

Document Control Desk
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: NUCLEAR PLANT NO. 2
LICENSEE EVENT REPORT NO. 89-020

Dear Sir:

Transmitted herewith is Licensee Event Report No. 89-020 for the WNP-2 Plant. This report is submitted in response to the report requirements of 10CFR50.73 and discusses the items of reportability, corrective action taken, and action taken to preclude recurrence.

This LER describes two related events associated with Engineered Safety Feature (ESF) isolations involving the Residual Heat Removal (RHR) System. Although the first event (May 27, 1989) was verbally reported to the NRC within the four-hour time frame required by 10CFR50.72, the second event (June 5, 1989) was not verbally reported as required. Plant personnel erred in overlooking the verbal notification requirement.

Very truly yours,

C.M. Powers (M/D 927M)
WNP-2 Plant Manager

CMP:lg
