WASHINGTON PUBLIC POWER SUPPLY SYSTEM

P.O. Box 968 • 3000 George Washington Way • Richland, Washington 99352

July 28, 1989
G02-89-128

Docket No. 50-397

U. S. Nuclear Regulatory Commission
Attn: Document Control Desk
Mail Station P1-137
Washington, D.C. 20555

Gentlemen:

Subject: SUPPLY SYSTEM NUCLEAR PLANT NO. 2
FINAL RESPONSE TO GENERIC LETTER 88-14
"INSTRUMENT AIR SUPPLY SYSTEM PROBLEMS
AFFECTING SAFETY-RELATED EQUIPMENT"

Reference: Letter, G02-89-116, GC Sorensen (SS) to NRC
same subject, dated July 6, 1989

As committed to in the reference, attached is the final summary of collected data and significant findings of the Instrument Air design and operations verification at WNP-2.

Although none of the findings identified are considered to jeopardize continued safe operation or impact the ability to safely shutdown the plant they are the subject of continued evaluation and will require final resolution. This will require additional analysis and further interface with equipment vendors. As a result resolution is not anticipated until September 15, 1989. At that time a follow-up report will be submitted describing final determinations and schedule for any remaining analysis and/or plant modifications.

Very truly yours,

Alan Sorensen
