Washington, D.C. 20555

Gentlemen:

Subject: NUCLEAR PLANT NO. 2
LICENSE NO. NPF-21
NRC INSPECTION REPORTS 89-06 AND 89-13

Reference: 1) Letter, G02-89-143, GD Bouchey (SS) to NRC
"NRC Inspection Report 89-06", dated August 21, 1989
2) Letter, G02-89-129, GD Bouchey (SS) to NRC
"NRC Inspection Report 89-13", dated July 28, 1989

The purpose of this letter is to provide revised scheduled completion dates for commitments made in response to Notices of Violation (NOVs) 89-06-09 and 89-13-05. The reason for the revised schedule is that completing the commitments has taken longer than was originally anticipated.

In Reference 1), the Supply System committed to a complete review of its work practices, including any necessary training required. The action was to be completed in two parts. The review was to be done by November 1, 1989 and the formal programmatic changes were to be accomplished by January 1, 1990. These two dates have been changed to December 1, 1989 and February 1, 1990, respectively.

In Reference 2), the Supply System committed to discuss the application of 10CFR 50.73(a)(2)(v), as it applies to single-train systems, during Licensed Operator Requalification Training (Requalification Cycle 89-06, September 4 - October 6, 1989). Although this was presented as part of reportability/compliance issue training briefings during Requalification Cycle 89-05 (July 31 - September 2, 1989), lesson plans have since been prepared and it is now anticipated that the training will be completed by November 30, 1989.

Very truly yours,

G. C. Sorensen, Manager
