December 14, 1989
G02-89-224

Docket No. 50-397

U. S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, D.C. 20555

Gentlemen:

Subject: NUCLEAR PLANT NO. 2, OPERATING LICENSE NPF-21
RESPONSE TO GENERIC LETTER 89-15, EMERGENCY
RESPONSE DATA SYSTEM

Reference Generic Letter 89-15, "Emergency Response Data
System", dated August 21, 1989

The purpose of the reference Generic Letter was stated as to solicit the participation of those utilities which have not yet volunteered in the Emergency Response Data System (ERDS) program. WNP-2 has not yet volunteered such participation.

By this letter the Supply System volunteers participation in the planning and scheduling for implementation of a ERDS link to WNP-2. The actual software and hardware changes to be implemented and maintained at Supply System expense will need to be agreed to at a later date between the Supply System and the NRC. This is not a commitment to implement any such changes that the NRC believes are needed to complete this program for WNP-2.

The generic letter also requested points of contact for follow up discussions. They are:

- o Technical questions of implementation - Ian Jenkins (509) 377-2139.
- o Licensining and commitment issues - Alan Hosler (509) 377-2327.

Very truly yours,

G. C. Sorensen, Manager
Regulatory Programs
