WASHINGTON PUBLIC POWER SUPPLY SYSTEM

P.O. Box 968 • 3000 George Washington Way • Richland, Washington 99352

August 20, 1990  
G02-90-138

Docket No. 50-397

U.S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Washington, D.C. 20555

Gentlemen:

Subject: NUCLEAR PLANT NO. 2, OPERATING LICENSE NPF-21  
ANTICIPATED TRANSIENTS WITHOUT SCRAM RECIRCULATION  
PUMP TRIP, TECHNICAL SPECIFICATION REVISION

As a result of discussions between Ms. P. Eng and Mr. H. Lee (NRR) and Messrs P. Powell and R. Green (Supply System) the Supply System has reevaluated the subject technical specification with respect to recent system modifications implemented during our spring 1990 refueling outage.

This reevaluation has identified changes to the technical specification needed to more closely align the technical specification with the present design. The Supply System has commenced processing the change anticipating being able to submit the change by September 28, 1990.

Very truly yours,

G. C. Sorensen, Manager  
Regulatory Programs
