Docket No. 50-397

U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, D.C. 20555

Gentlemen:

Subject: NUCLEAR PLANT NO. 2, OPERATING LICENSE NPF-21
DOCUMENTATION OF THE USE OF ASME CODE CASE N-416

Refernece: Letter, TM Novak (NRC) to GC Sorensen (SS), same subject,
dated August 6, 1985.

The reference letter authorized the use of ASME Code Case N-416 at WNP-2 for application in the repair or replacement of Class 2 piping for WNP-2 with the limitations stated in the "Inquiry" and "Reply" section of the Code Case.

The letter stated that documentation of the use of the Code Case should be included in the FSAR. In FSAR Amendment 42, issued in August 1990, we documented the first use of the Code Case (page C.3-116).

As use of this Code Case has now been incorporated into Regulatory Guide 1.147, and as this guide does not require documentation of the use of Code Cases, we do not plan on documenting additional use of Code Case N-416 in the FSAR.

Please inform us if this is not acceptable to the NRC.

Very truly yours,

R. Sorensen
