Docket No. 50-397

U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, D.C. 20555

Gentlemen:

Subject: NUCLEAR PLANT NO. 2, OPERATING LICENSE NPF-21
REQUEST FOR EXEMPTION FROM 10CFR55.45(b)(2)(iii)
FILING DEADLINE, AND 10CFR55.45(b)(2)(iv)

Reference: Letter, G02-90-069, GC Sorensen (SS) to NRC,
same subject, dated April 4, 1990

In the reference letter the Supply System requested an exemption from the requirements of 10CFR55.45(b)(2)(iii) and 10CFR55.45(b)(2)(iv) under the provisions of 10CFR50.12. Specifically, we requested an exemption from the filing requirement of 55.45(b)(2)(iii) to allow for our submittal of NRC Form-474, "Simulation Facility Certification" by December 31, 1991 rather than by the March 26, 1991 deadline provided in the rule. Additionally we requested an exemption from the requirements of 55.45(b)(2)(iv) to allow us to continue to administer the simulator facility portion of the operating tests on the current WNP-2 simulator as upgraded until the new simulator's certification is complete.

The Supply System would like to amend its pending request for exemption to September 30, 1992. A recent review of the progress of our simulator procurement leads us to anticipate a delivery coincident with our initial request of December 31, 1991. We have elected this later date to reasonably accommodate any additional unforeseen delays in the completion of our simulator.

Should you have any questions regarding this matter, please contact myself or D. W. Fraley, Manager, Simulator Projects at (509) 377-8166.

Very truly yours,

R. Sorensen
