Subject: NUCLEAR PLANT NO. 2
LICENSEE EVENT REPORT NO. 90-028~

Dear Sir:

Transmitted herewith is Licensee Event Report No. 90-028 for the WNP-2 Plant. This report is submitted in response to the report requirements of 10CFR50.73 and discusses the items of reportability, corrective action taken, and action taken to preclude recurrence. As allowed by NUREG 1022, more than one event is reported in this single LER because the events were related and they occurred over a reasonably short length of time.

This report is being submitted beyond the 30-day time limit because it was thought that the initiating event (October 23, 1990) would be downgraded to not reportable. However, upon further review, it was determined that the October 23, 1990 event was reportable and; therefore, the reportability "clock" began on that date. Accordingly, the actual report due date was November 26, 1990. (November 22 and 23, 1990 were Supply System holidays). The late submission of this LER was discussed with the NRC Resident Inspector for WNP-2.

Very truly yours,

J. W. Baker (M/D 927M)
WNP-2 Plant Manager

JWB:lr
