WASHINGTON PUBLIC POWER SUPPLY SYSTEM

P.O. Box 968 • 3000 George Washington Way • Richland, Washington 99352

April 26, 1991
G02-91-083

Docket No. 50-397

U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, D.C. 20555

Gentlemen:

Subject: NUCLEAR PLANT NO. 2, OPERATING LICENSE NPF-21
REQUEST FOR AMENDMENT TO TECHNICAL SPECIFICATIONS
SAFETY LIMIT; THERMAL POWER, HIGH PRESSURE AND
HIGH FLOW - ADDITIONAL INFORMATION (TAC NO. 79884)

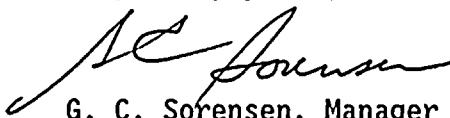

Reference: 1) Letter, G02-91-040, GC Sorensen (SS) to NRC,
same subject, dated February 28, 1991
2) Letter, G02-91-054, GC Sorensen (SS) to NRC,
same subject, dated March 21, 1991
3) Letter, PL Eng (NRC) to GC Sorensen (SS), "Request
for Additional Information Regarding Request for
Amendment to the Technical Specification Safety
Limit: Thermal Power, High Pressure and High
Flow (TAC No. 79884)", dated April 19, 1991

In Reference 3 the NRC requested that the Supply System identify the document which is referred to as "Reference 5" on page A-1 of Attachment II to the Supply System's submittal of February 28, 1991 (Reference 1). The purpose of this letter is to identify that document.

As discussed in the telephone conference call among the NRC, the Supply System, and ANF held on April 17, 1991, "Reference 5" refers to ANF topical report XN-NF-524(P)(A), Revision 2 and Supplements dated November 1990. This same document is also referred to (by name) on pages A-3 and A-4 of Attachment II. This topical report has previously been reviewed and approved by the NRC.

As discussed in Reference 2, this document can also be correctly referred to as ANF-524(P)(A), Revision 2 and Supplements. To refer to ANF topical reports using the ANF prefix is the more current practice, but either way is correct.

Very truly yours,

G. C. Sorensen, Manager
Regulatory Programs
