Docket No. 50-397

U.S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Washington, D.C. 20555

Gentlemen:

Subject: NUCLEAR PLANT NO. 2, OPERATING LICENSE NPF-21  
REQUEST FOR AMENDMENT TO TECHNICAL SPECIFICATIONS  
IMPLEMENTATION OF GENERIC LETTER 88-16,  
ADDITIONAL CHANGE (TAC NO. 77311)

- References: 1) Letter, G02-91-040, GC Sorensen (SS) to NRC, "Request for Amendment to Technical Specifications Safety Limits; THERMAL POWER, High Pressure and High Flow," dated February 28, 1991 (TAC No. 79884)
- 2) Letter, G02-90-132, GC Sorensen (SS) to NRC, same subject, dated August 2, 1990

In Reference 1) a change was requested to the Minimum Critical Power Ratio (MCPR) in Specification 2.1.2 (THERMAL POWER, High Pressure and High Flow). The approval of the above MCPR change necessitates an additional administrative change to Technical Specification page 3/4 4-1, a copy of which is attached. Due to an oversight by the Supply System, we failed to identify this as a proposed change in our "COLR" submittal (Reference 2).

The attached change simply deletes the inclusion of the previously approved MCPR Safety Limit, while maintaining the reference to Specification 2.1.2, which will contain the newly approved and more conservative MCPR Safety Limits.

Adol  
1/18

Page Two

REQUEST FOR AMENDMENT TO TECHNICAL SPECIFICATIONS  
IMPLEMENTATION OF GENERIC LETTER 88-16,  
ADDITIONAL CHANGE (TAC NO. 77311)

The Supply System considers this change to be administrative in nature, and is being done to maintain internal consistency between the various Technical Specification sections. This change does not alter the scope of either of the above amendment requests, and does not affect the initial No Significant Hazards Consideration conclusions. We apologize for any inconvenience this may have caused.

Very truly yours,

*G. C. Sorensen*
