Docket No. 50-397

U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, D.C. 20555

Gentlemen:

Subject: NUCLEAR PLANT NO. 2, OPERATING LICENSE NPF-21
WNP-2 CYCLE 7 CORE OPERATING LIMITS REPORT

Reference: Letter, NRC to Supply System, "Issuance of Amendment No. 94
to Facility Operating License No. NPF-21 for the WPPSS
Nuclear Project No. 2 (TAC No. 77311)", dated June 4, 1991

As authorized by the reference letter, enclosed is an uncontrolled copy of the WNP-2 Cycle 7 Core Operating Limits Report, COLR 91-7, Rev. 0, dated June 1991. This report is being provided upon issuance as required by Technical Specification 6.9.3.4.

The changes in core thermal limits resulting from the analyses performed in support of the preparation of the Cycle 7 COLR have been evaluated against the criteria of 10 CFR 50.59. That evaluation determined that neither a change in the Technical Specifications is required nor does an Unreviewed Safety Question exist. This report and the changes in core thermal limits therein have been reviewed and approved by the WNP-2 Plant Operations Committee (POC).

At the present time we expect to achieve reactor criticality, thereby starting cycle 7, no sooner than July 3, 1991. Should you have any questions or concerns, please contact us immediately.

Very truly yours,

G. C. Sorensen, Manager
Regulatory Programs
