Docket No. 50-397

U. S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, D. C. 20555

Gentlemen:

Subject: **WNP-2, OPERATING LICENSE NPF-21
NRC INSPECTION REPORT 92-01
RESPONSE TO NOTICE OF DEVIATION B
(ADDITIONAL INFORMATION)**

Reference: Letter GO2-92-135 dated June 4, 1992, L. L. Grumme (Supply System) to NRC,
same subject

The reference provided a schedule for corrective action items identified in the response to the Notice of Deviation. One corrective action was submittal of a Technical Specification change request.

The purpose of this letter is to inform the NRC that the Technical Specification change will not be submitted until September 2, 1992. The delay is necessitated by the complexity of the calculation involved and identification of the need to also include changes to the attendant Action Statements.

This situation was discussed in a telephone conversation between M. J. Royak of your staff and P. L. Powell on August 11, 1992.

Sincerely,

J. C. Gearhart, Director
Quality Assurance (Mail Drop 280)
