"Response to NRC Augmented Inspection Team Report"

Transmitted herewith is Licensee Event Report No. 92-037-01 for the WNP-2 Plant. This LER revision provides updated information regarding the manual reactor scram due to core instability and associated reportable events. Additional information associated with this event is contained in the references. References 2) through 4) provided a preliminary description and root cause analysis of this event. Reference 6) provides the Supply System response to the Augmented Inspection Team Report including management initiatives being taken in response to this event.
