Docket No. 50-397

U. S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Mail Station P1-137  
Washington, D. C. 20555

Gentlemen:

Subject: **WNP-2 OPERATING LICENSE NO. NPF-21 TRANSMITTAL OF FINAL REPORT  
"EVALUATION OF THE SOURCE OF RADIOACTIVE MATERIAL FOUND IN  
COOLING TOWER SEDIMENT" PREPARED BY J. S. BLAND ASSOCIATES, INC.**

Reference: Letter G02-93-198, dated July 30, 1993, J. V. Parrish to NRC, "WNP-2 Operating License  
NPF-21, NRC Inspection Report 92-41, Amended Response to Notice of Violation"

The reference responded to the issue of WNP-2 licensed material in the Cooling Tower Sediment. The Supply System is providing a copy of the final report by J. S. Bland Associates, Inc., which updates the draft report provided to the NRC Inspectors during their earlier visit.

This report is being formally transmitted for review by Region V. This report provided our basis for determining that the radioactivity detected in our Cooling Tower Sediments is not of WNP-2 Plant origin. This report now represents the Supply System's official position on the origin of radioactivity in the Cooling Tower.

Sincerely,

J. V. Parrish (Mail Drop 1023)  
Assistant Managing Director, Operations
