Subject: NUCLEAR PLANT WNP-2, OPERATING LICENSE NPF-21
LICENSEE EVENT REPORT NO. 93-010-05

Transmitted herewith is Licensee Event Report No. 93-010-05 for the WNP-2 Plant. This report is submitted in response to the report requirements of 10CFR50.73 and discusses the items of reportability, corrective action taken, and action taken to preclude recurrence. Supplement 5 includes six new reportable conditions labeled as Items 10 through 15.

As this LER is the result of similar findings of an ongoing activity to improve our Technical Specification Surveillance Program, it is likely that additional reportable items will be identified. Using the flexibility allowed for similar situations under NUREG 1022, Supplement 1, Paragraphs 14.13 and 14.14, the Supply System will submit future supplements to this LER on an approximate quarterly basis, or as necessary, to describe any additional reportable items. Immediate notification will be provided for any items determined to meet the requirements of 10CFR50.72.

Sincerely,
