Docket No. 50-397

U.S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Washington, D.C. 20555

Gentlemen:

Subject: **WNP-2, OPERATING LICENSE NPF-21  
WITHDRAWAL OF REQUESTS FOR AMENDMENT TO  
TECHNICAL SPECIFICATIONS**

- References:
- 1) Letter G02-90-178, dated October 23, 1990, GC Sorensen (SS) to NRC, "Request for Amendment to Technical Specification 3.1.3.1, Actions for Inoperable Scram Discharge Volume Vent and Drain Lines"
  - 2) Letter G02-91-043, dated March 1, 1991, GC Sorensen (SS) to NRC, "Request for Amendment to Technical Specification 3.1.3.5, Control Rod Scram Accumulators"
  - 3) Letter G02-92-166, dated July 13, 1992, GC Sorensen (SS) to NRC, "Request for Amendment to Technical Specifications 3/4.6.5.3, Standby Gas Treatment, and 3/4.7.2 Control Room Emergency Filtration Systems"
  - 4) Letter G02-93-029, dated February 10, 1993, GC Sorensen (SS) to NRC, "Request for Amendment to Technical Specification 4.1.3.1.4.a, Reactivity Control Systems, Scram Discharge Volume Valve Testing"
  - 5) Letter G02-92-088, dated April 10, 1992, GC Sorensen (SS) to NRC, "Request for Amendment to Technical Specification 3/4.4.6 Pressure/Temperature Limits"

In conjunction with the NRC Project Manager for WNP-2, the Supply System has determined that several Technical Specification Amendment requests could be more concisely written to support NRC review and approval. The Supply System goal is to provide to the staff well documented requests. As such, the amendment requests contained in References 1 through 5 are withdrawn from further NRC consideration.

**WITHDRAWAL OF REQUESTS FOR AMENDMENT TO  
TECHNICAL SPECIFICATIONS**

The Supply System will evaluate the withdrawn submittals for either re-submittal at a later date, or for inclusion in the "Improved Technical Specifications." In particular, References 1 and 4 will be resubmitted as a single submittal that will require NRC review and approval prior to March 17, 1995, in order to avoid a forced plant scram to complete the scram discharge volume drain and vent valve testing in accordance with the current Surveillance Requirement 4.1.3.1.4.

Withdrawal of the referenced requests is part of the Supply System effort to improve overall plant performance. By withdrawing those requests which could require higher than normal staff and Supply System resources to resolve potential questions, these resources can more effectively be devoted to the remaining pending, and future, Supply System submittals.

Should you have any questions or desire additional information regarding this matter, please call me or D.A. Swank at (509) 377-4563.

Sincerely,

J.V. Parrish (Mail Drop 1023)  
Assistant Managing Director, Operations
