WASHINGTON PUBLIC POWER SUPPLY SYSTEM

P.O. Box 968 • 3000 George Washington Way • Richland, Washington 99352-0968 • (509) 372-5000

October 12, 1994
GO2-94-234

Docket No. 50-397

U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, D.C. 20555

Gentlemen:

Subject: **WNP-2, OPERATING LICENSE NPF-21
REQUEST FOR AMENDMENT TO THE FACILITY OPERATING
LICENSE AND TECHNICAL SPECIFICATIONS TO INCREASE
LICENSED POWER LEVEL FROM 3323 MWt TO 3486 MWt WITH
EXTENDED LOAD LINE LIMIT AND A CHANGE IN SAFETY RELIEF
VALVE SETPOINT TOLERANCE, SUPPLEMENTARY INFORMATION**

Reference: Letter GO2-94-221, dated September 26, 1994, JV Parrish (SS) to NRC,
same subject

The reference provided supplementary information to support an increase in licensed power level. Included with the reference were proposed changes to the WNP-2 Technical Specifications and Bases. An error has been identified in the proposed statement for Bases 3/4.2.6, "Power/Flow Instability." Attachment 1 indicates the corrections to the proposed Bases 3/4.2.6. Attachment 2 is a replacement page for proposed Bases 3/4.2.6.

A part of this Bases discusses how the power/flow map is divided into several regions of varying concern (Regions A, B and C) as recommended by the General Electric Service Information Letter (SIL) 380. Both regions A and C were discussed in the 3/4.2.6 Bases provided by the reference. The discussion of how Region C was determined is correct but should not have been discussed in context with Figure 3.2.6-1 because this figure is for Region A only. The attached replacement page for Bases 3/4.2.6 corrects this error.

**REQUEST FOR AMENDMENT TO TECHNICAL SPECIFICATIONS TO INCREASE
POWER LEVEL FROM 3323 MWt TO 3486 MWt, SUPPLEMENTARY INFORMATION**

This is an editorial correction to the proposed 3/4.2.6 Bases and does not affect the conclusions provided in the reference with respect to the no significant hazards determination or the categorical exclusion for an environmental assessment provided by the reference. The State of Washington has been provided a copy of this letter.

Should you have any questions or desire additional information regarding this matter, please call me or Mr. D.A. Swank, Licensing Manager, at (509) 377-4563.

Sincerely,

J. V. Parrish (Mail Drop 1023)
Assistant Managing Director, Operations

$$z = \frac{y}{x} + i \quad \Rightarrow \quad \frac{dy}{dx} = -\frac{x^2 + y^2}{y}$$

The map shows the northern Adriatic coastline from Trieste in the north to the Gulf of Genoa in the south. Sampling stations are indicated by numbered dots (1-10) along the coast. Station 1 is near Trieste, and station 10 is near the Gulf of Genoa. The map includes latitude lines (45°N, 44°N, 43°N) and longitude lines (12°E, 13°E, 14°E, 15°E). A scale bar at the bottom indicates distances from 0 to 100 km.
