Docket No. 50-397

U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, D.C. 20555

Gentlemen:

Subject: **WNP-2, OPERATING LICENSE NPF-21
WORK MANAGEMENT SYSTEM COMMITMENT CLARIFICATION**

Reference: Letter GO2-93-269, dated November 15, 1993, JV Parrish (SS) to BH Faulkenberry (NRC), "WNP-2 Operating License NPF-21 Systematic Assessment of Licensee Performance (SALP)"

The purpose of this correspondence is to provide clarification of commitments pertaining to implementation of improvements to our computerized work management system. In the reference it was stated that, "For the first step in implementation, newly identified deficiencies are being recorded and planned in PASSPORT and existing, unplanned deficiencies are being transferred from PPICS to PASSPORT. Both PASSPORT and PPICS work packages are being worked in the field. This will continue until December 31, 1993, when work in PPICS will cease." Furthermore, it was also stated in the reference that, "The second step in the Work Management System implementation will be to bring on-line the PASSPORT Preventive Maintenance/Surveillance Program. This will take place during the first three weeks of December, 1993."

These commitments have been met as stated, with the exception of phasing the Power Plant Information Control System (PPICS) out of service by December 31, 1993. Although the PASSPORT Preventive Maintenance/Surveillance Program was implemented as scheduled, we continued to maintain the PPICS Scheduled Maintenance System (SMS) database in 1994. Both databases were maintained until it was verified that the new PASSPORT system for tracking Technical Specification surveillances would function as designed. Following this testing period, the PPICS was deactivated and final conversion of the SMS database to the PASSPORT system was completed on October 7, 1994.
