Docket No. 50-397

U.S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Washington, D.C. 20555

Gentlemen:

Subject: **WNP-2, OPERATING LICENSE NPF-21  
WITHDRAWAL OF REQUEST FOR AMENDMENT TO TECHNICAL  
SPECIFICATIONS**

- References:
1. Letter GO2-93-256 dated October 21, 1993, JV Parrish (SS) to NRC, "Request For Amendment To Technical Specifications To Relocate Component Lists In Accordance With Generic Letter 91-08 And Selected Implementation Of The Commission's Policy Statement On Technical Specifications Improvements"
  2. Letter GO2-95-265 dated December 8, 1995, JV Parrish (SS) to NRC, "Request For Amendment To Technical Specifications"

The Supply System requested an amendment to the Technical Specifications in Reference 1 to implement the recommendations of Generic Letter 91-08 for component list relocation. This request also proposed relocation of selected Limiting Condition for Operation as provided for in the Commissions' Final Policy Statement on Technical Specifications Improvements for Nuclear Power Reactors as noticed in the Federal Register on July 22, 1993. Since the time of this amendment request the Supply System requested a conversion to the "Improved Technical Specifications" format in Reference 2. As such, the changes requested in Reference 1 will be achieved through implementation of Reference 2.

In order to make better use of limited NRC staff and utility resources, the Supply System hereby withdraws the Reference 1 amendment request. This will allow the available resources to be used for activities such as the review and approval of Reference 2.
