Docket No. 50-397

Mr. James M. Taylor
Executive Director For Operations
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Taylor,

Subject: **WNP-2, OPERATING LICENSE NPF-21
ORGANIZATIONAL ENHANCEMENTS**

As we recently discussed, I have instituted organizational changes at the Supply System to improve efficiency. My revised organizational structure is shown on the attached chart. I expect these changes to allow us to better focus our resources on plant safety and productivity. As you are well aware, these improvements are necessary in the current competitive electricity market in the Pacific Northwest.

Toward the goal of improved safety and efficiency, I have asked my Vice-Presidents to review the structure shown on the attached chart to identify other organizational efficiency gains. These changes, which are expected to be minor in nature, will be implemented in the near term.

As you can see from the attached chart, the changes more closely align the Supply System structure to that at other single unit nuclear utilities. Several other plants were reviewed as part of this decision making process.

I appreciate the opportunity we had to discuss these changes prior to implementation. If there are any questions please feel free to contact me at (509) 377-8031. Members of your staff may contact D.A. Swank at (509) 377-4563.

Sincerely,

J.V. Parrish
Managing Director (Mail Drop 1023)
